Background

We Make NAVARA Because...

- Students/travelers waste time comparing prices across many sites, causing confusion and missed deals.
- Hidden fees make trips exceed budget unexpectedly
- Group travel planning is difficult due to schedule conflicts and poor coordination.
- Budget sharing among friends lacks clarity and control.

With Navara, you can book, schedule, and budget in one platform for faster, simpler, and cheaper trips

Problem

With NAVARA, We Solve...

- Travel planning that requires using many platforms, which creates inefficiency and confusion.
- Price differences and hidden fees that make budgeting unreliable.
- The difficulty of tracking and splitting costs among travelers

So...

What is NAVARA?

Navara is a budget student travel website that helps to plan and book affordable trips in one, simple platform without the confusion of comparing individual websites and avoiding hidden costs, helping align schedules with friends and budget pool with other fellow travelers.

It's a website that contains every useful feature in one website that promotes convenience, smoothness, and efficiency for all student/budget travellers.

Opportunity

Potential Value :

The opportunity is students face issues with booking a lot of travel plans, so it unlocks value for both the user and travel industry by solving this problem. This is because a lot of the people who decide to have cheaper travel, especially students, budget travelers or even single travelers. This causes an issue to where they really being able to plan things, then also lessening their chances to travel because of the lack of transparency. So when we create an online budget-focused app, we basically allow them to not spend too much time on planning and help to also build a lot of customer loyalty, and make travel far more accessible.

Why Should Stakeholders care ?

- Connects users with affordable local businesses, driving economic growth.
- High student demand leads to strong engagement, repeat usage, and loyalty
- Scalable revenue through bookings and partnerships with a trusted, transparent platform

THINK & FEEL

- Wants to travel across Southeast Asia without running out of money
- Worried about hidden costs and unsafe budget accommodations
- Excited to experience new cultures and meet people worldwide
- Feels stressed when planning requires checking many different websites
- Hopes her savings will last for the full 6-month journey

HEAR

- Friends suggesting destinations, accommodations, and attractions.
- Travel vloggers sharing money-saving tips and affordable destinations.
- Family advising her to be cautious with spending and prioritize safety.
- Influencers encouraging trendy tourist activities.
- Fellow students talking about their study-abroad and travel experiences.

SEE

- Social media influencers sharing visually appealing backpacking experiences.
- Friends posting travel highlights and discounted flight offers.
- Travel platforms advertising premium or costly packages.
- Other students attempting to travel affordably.
- Online promotions for airlines, tours, and hostels.

EMPATHY MAP

SAY & DO

- Looks online for budget flights, accommodations, and authentic local experiences.
- Saves inspiring travel posts and discusses plans in group chats.
- Compares different travel plans and carefully checks reviews before booking.
- Regularly uses map apps and airline apps during her trip.
- Chooses activities that are meaningful, local, and reasonably priced.

PAIN

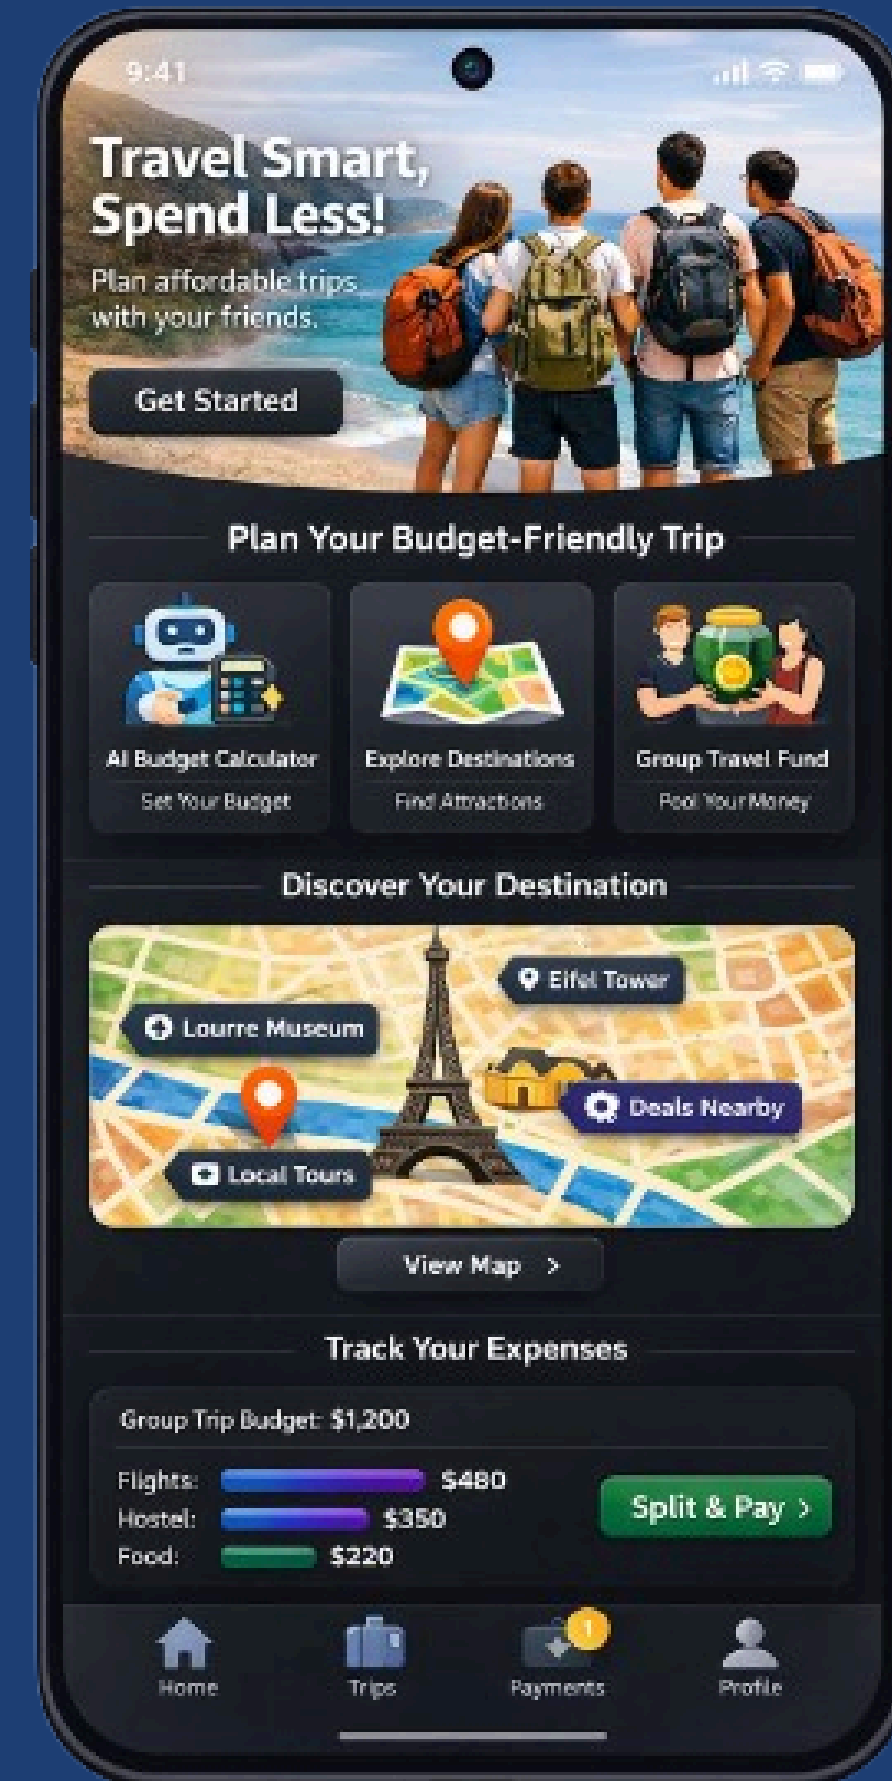

- Having to use multiple platforms for booking flights, hotels, and activities.
- Unexpected extra charges appearing at checkout.
- Difficulty trusting reviews for very cheap stays.
- Trouble aligning travel schedules with friends.
- Anxiety about spending too much before finishing the journey.

GAIN

- A single platform that clearly displays total travel costs upfront.
- Simple comparison of various affordable travel plans.
- Reliable access to verified budget accommodations and local guides.
- An easy way to share travel plans with friends.
- Peace of mind knowing she can travel longer without exceeding her budget.

Prototype

www.navara.com

Key Features

1. *Group Budget Pooling*

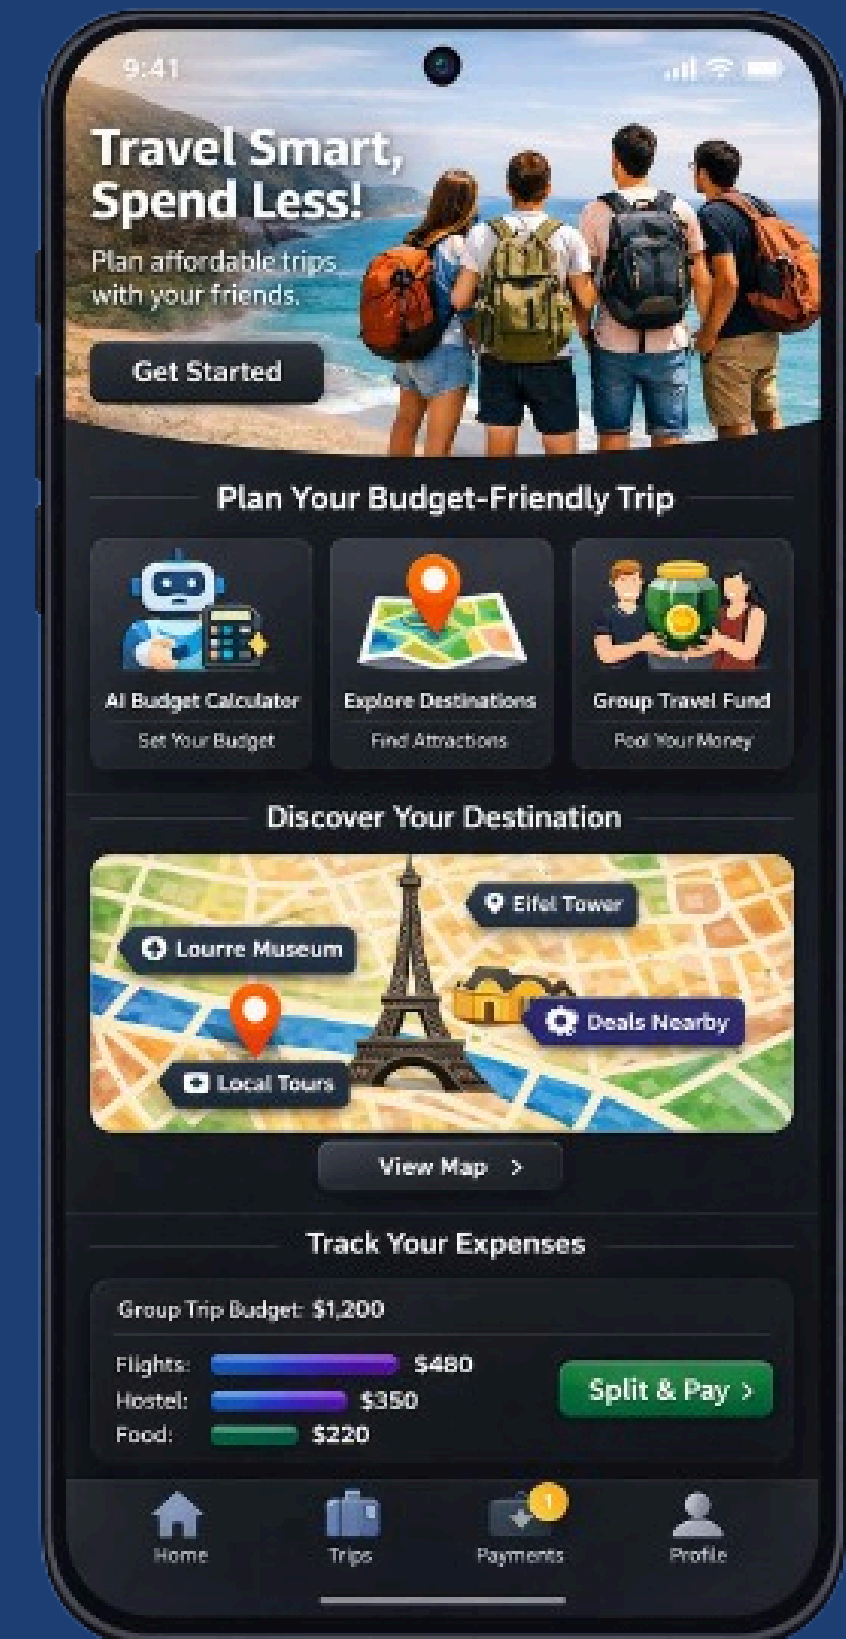

Invite friends, split expenses, and manage shared budgets in one place. This allows them to handle payments and decision making in one place, allowing it to be a more smoother process and a more real user experience.

2. *Tourist Attraction Map*

A tourist attraction map for any of the users of this platform will allow us to understand where are the attractions being placed around the country and also experiences that they can explore through their budget styles and their travel limits. So this will let students explore a destination visually, filter it by price, and also help them plan the daily itinerary directly through this app.

3. *AI Budget Calculator*

AI Budget Calculator users will have their total budget, preferences, any sort of timings. This allows us to optimize any sort of travel plans without it being too confusing for the users. It allows us to create a complete cost breakdown so it allows students or budget travelers to stay within their budget.
